Publish your Portfolio to Github Pages

In this lab, you will publish the portfolio page to Github Pages.

GitHub Pages is a static site hosting service that takes HTML, CSS, and JavaScript files straight from a repository on GitHub, optionally runs the files through a build process, and publishes a website.

Pre-Requsites

Before doing this lab, you need to have:

1. Completed the Final Project: Portfolio Website (https://cf-courses-data.s3.us.cloud-object-storage.appdomain.cloud/IBMDeveloperSkillsNetwork-CD0101EN-SkillsNetwork/labs/Project/Final_Project_V3/final-project_instructions_v3.md.html).

2. Downloaded the Final Project having the below files and folders to your local system:

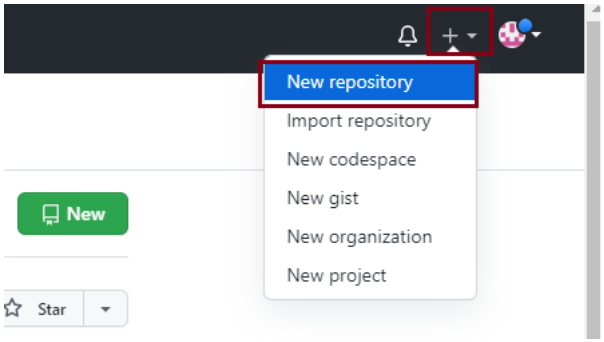
- **index.html**
- **style.css**
- **script.js**
- **html_finalprojimages** folder with the relevant image files

Instructions

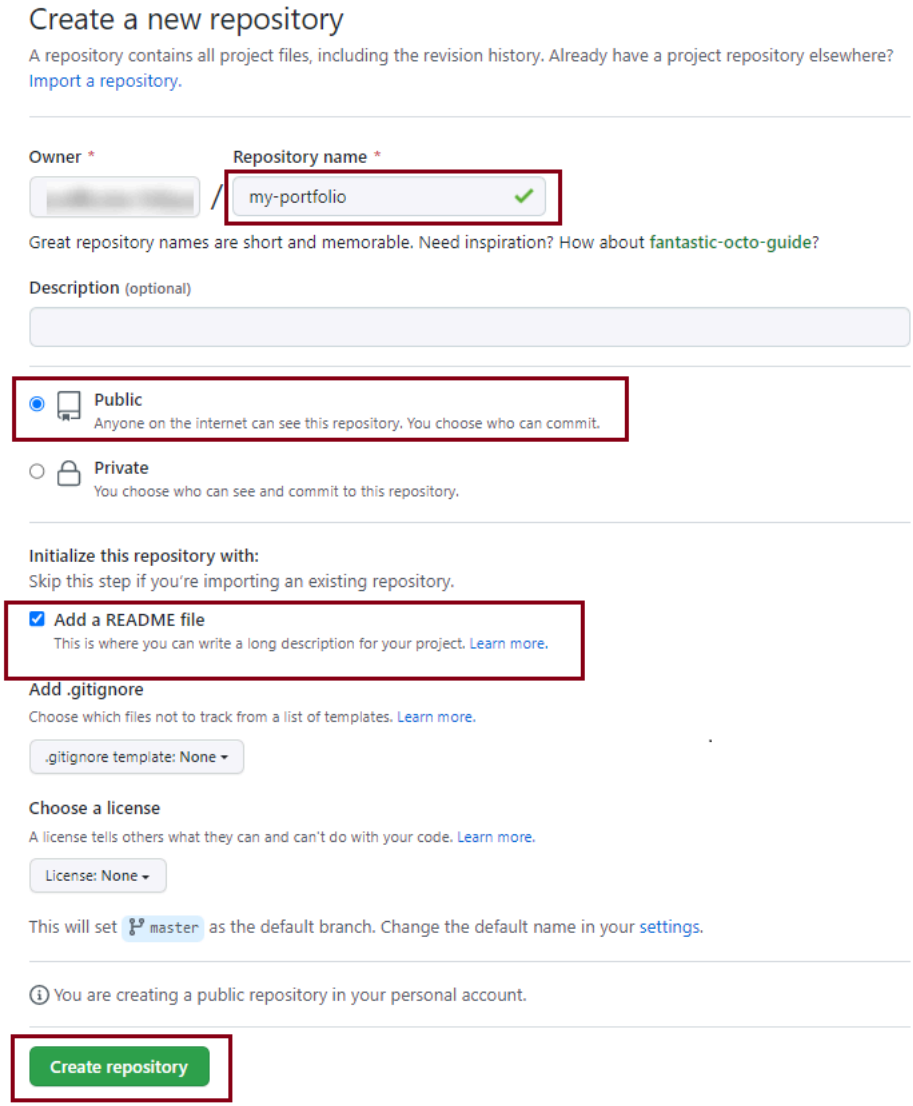
Task 1 : Create a Github repository & the branch for the Github Pages link

1. Sign up for a new Github account at https://github.com/ , or login if you already have an account.

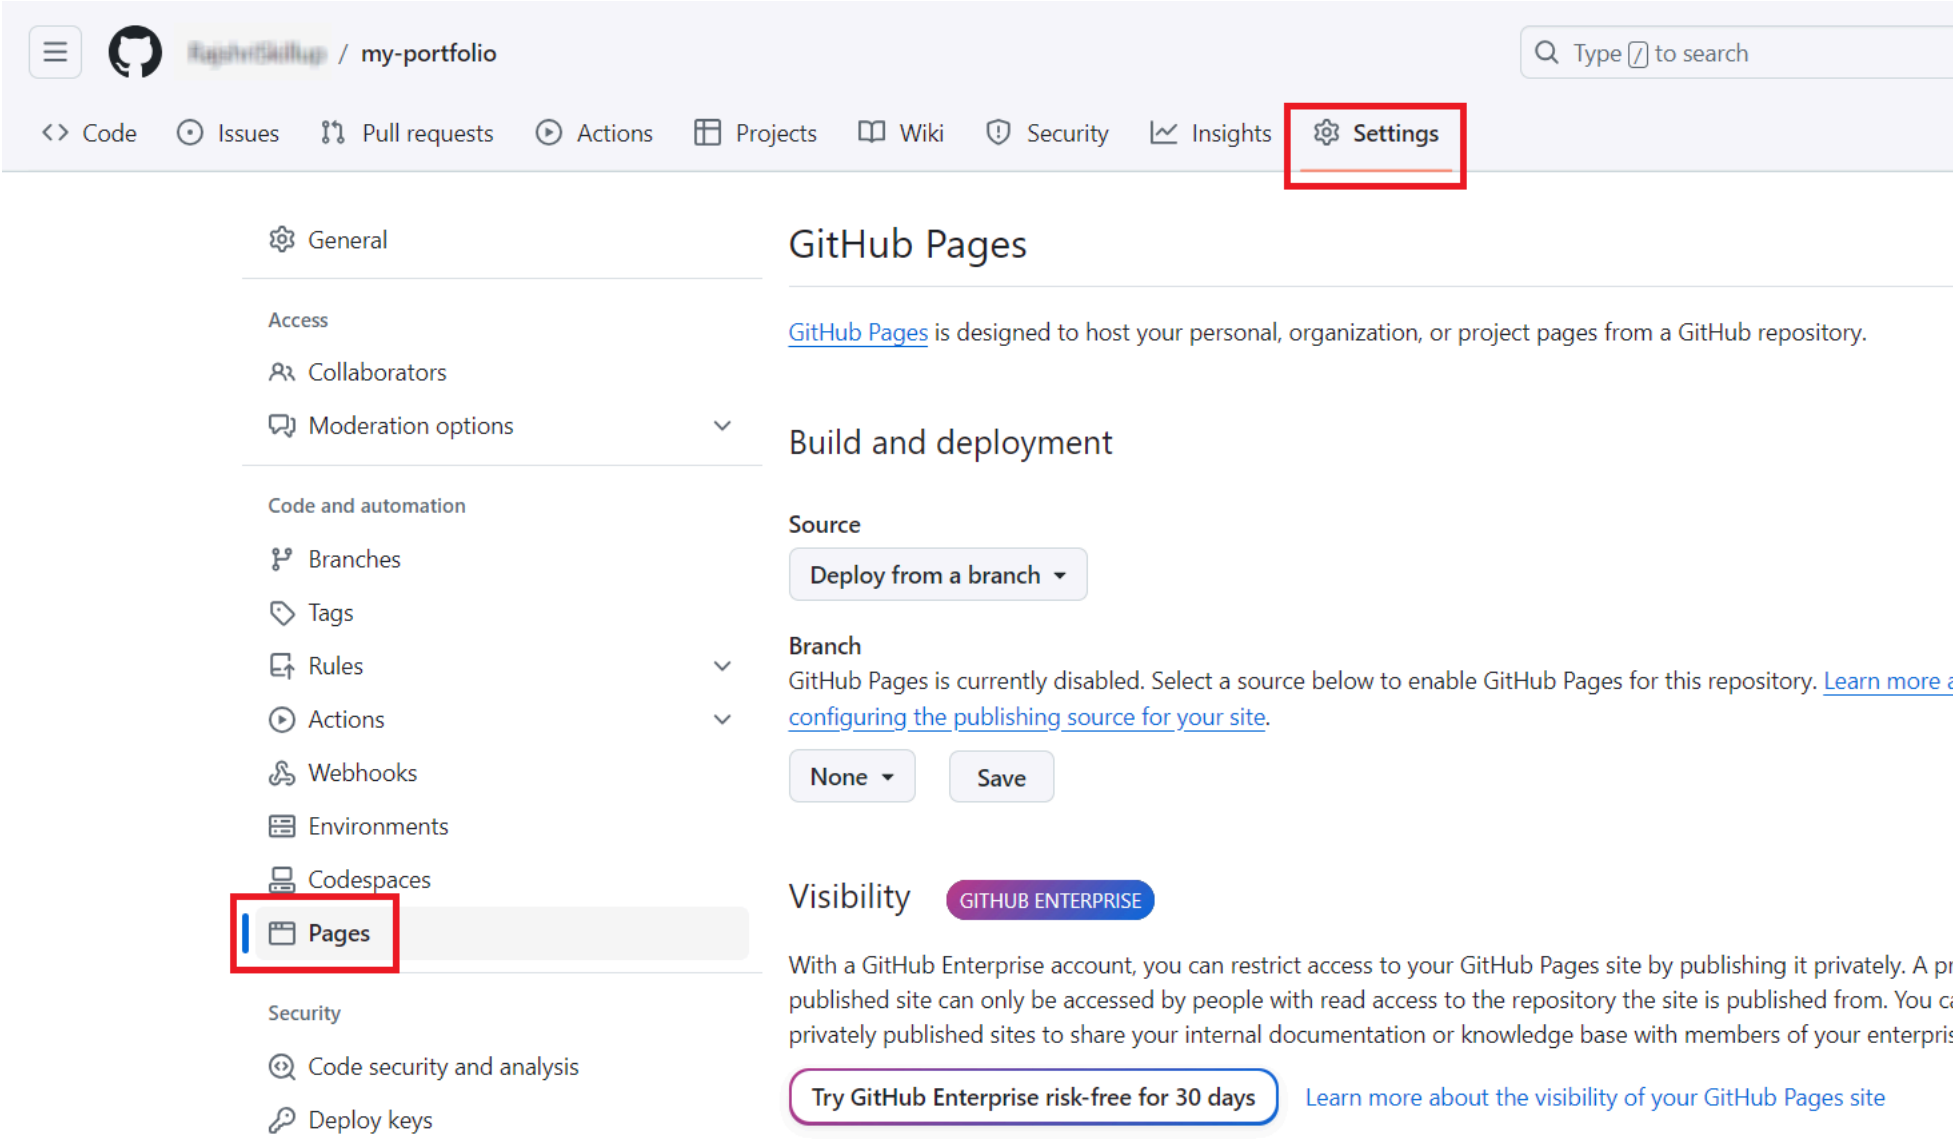
2. Create a new repository by clicking on the `+` dropdown at the top right, and selecting `New repository`.



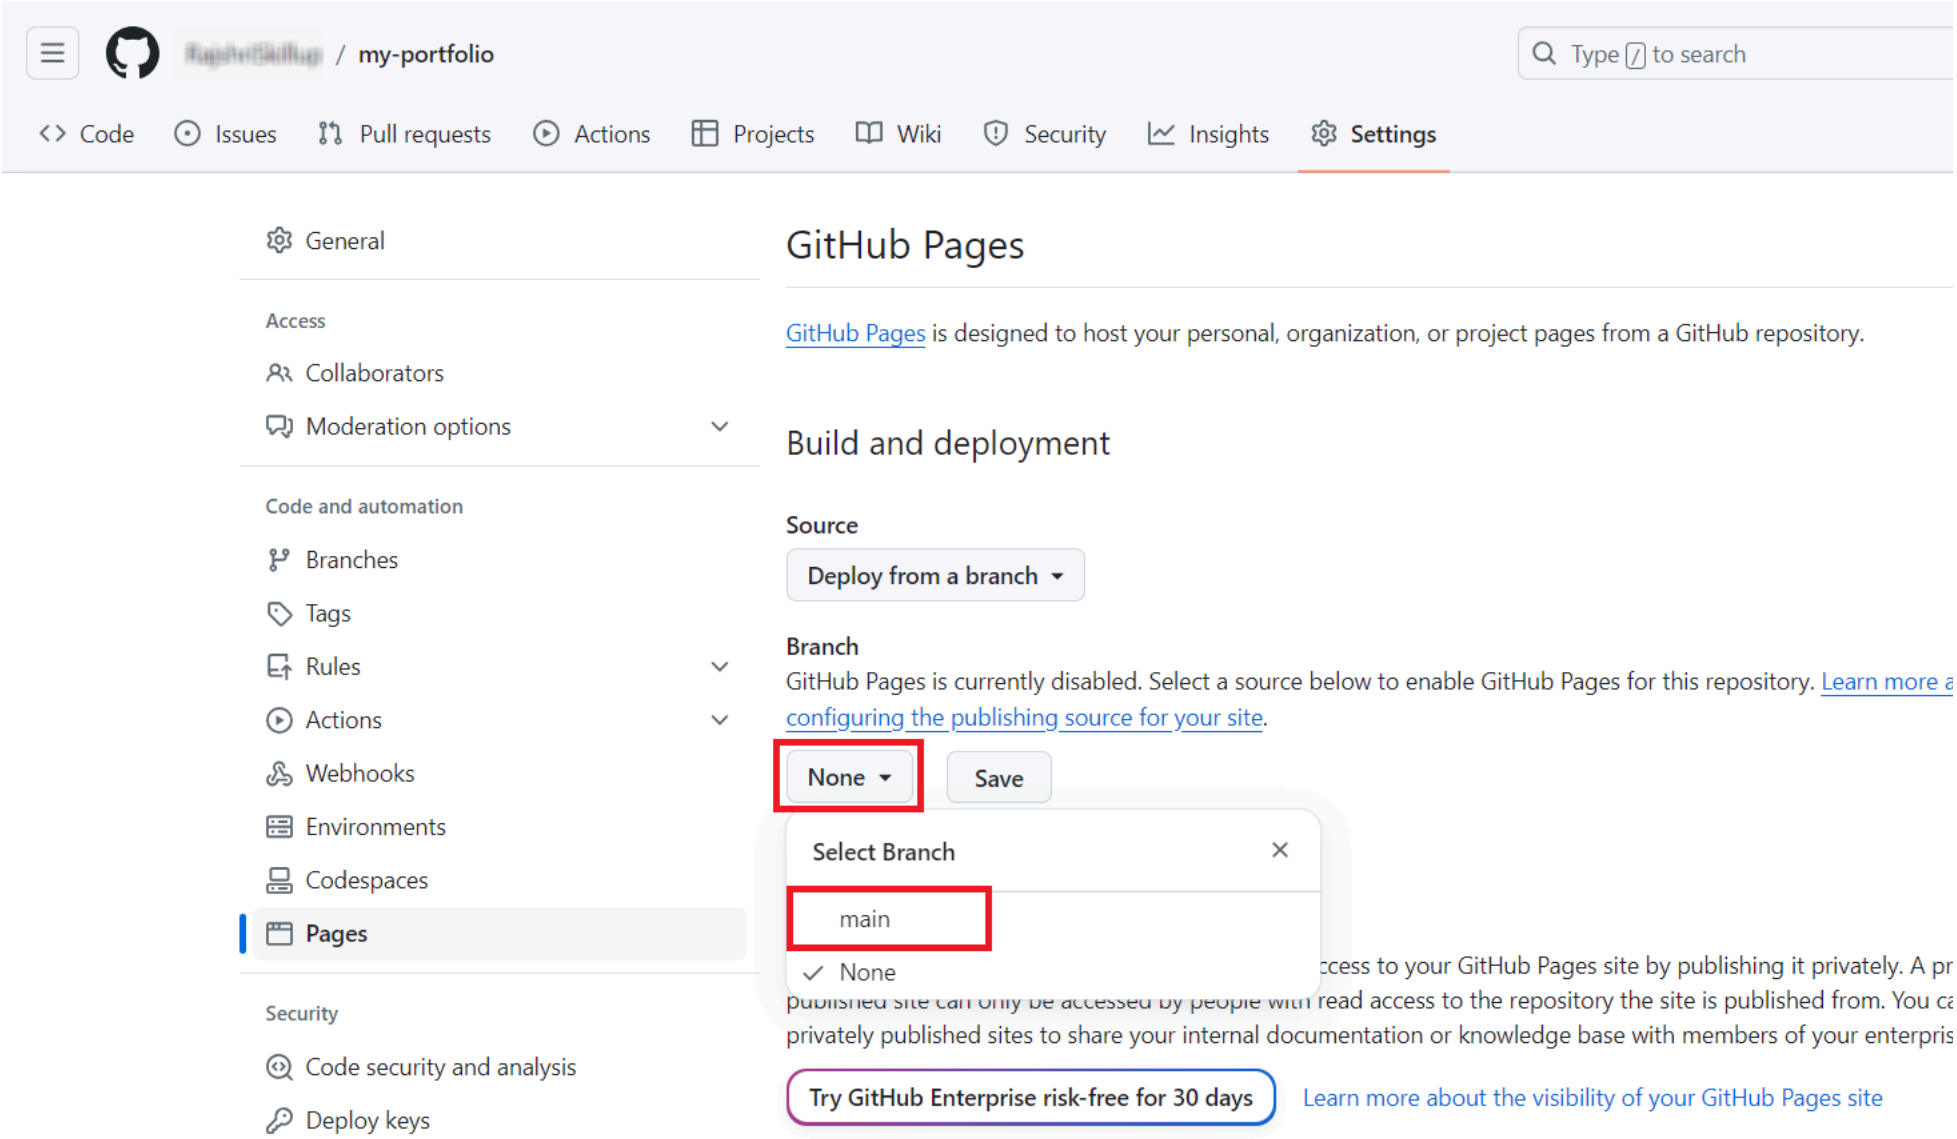
3. Give it an appropriate name like **my-portfolio**. eg.,**JaneDoe-portfolio**. Select the repository type as **Public**, select **Add a README file**, and click on `Create repository`.



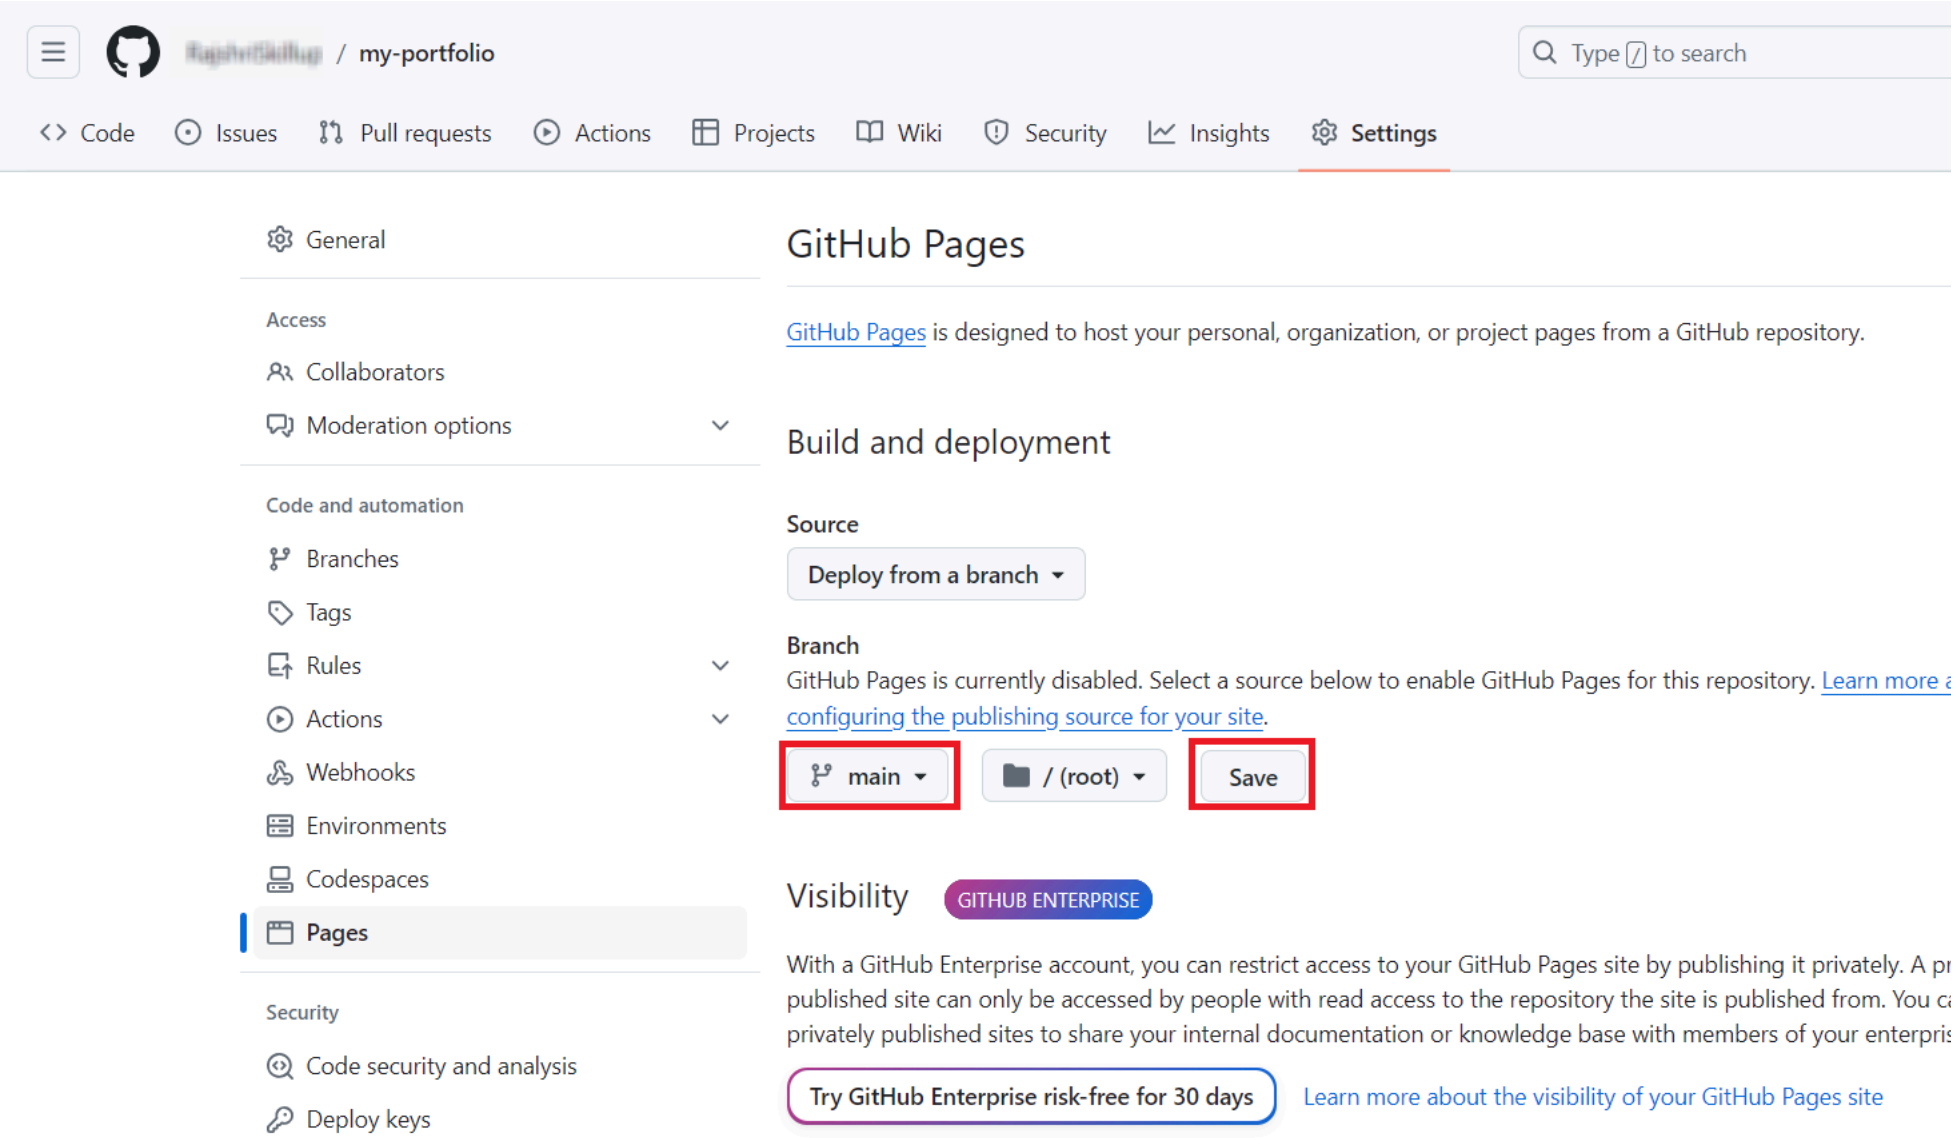
4. Go to `Settings` and select `Pages`.



5. Select the branch as `main` from the dropdown.



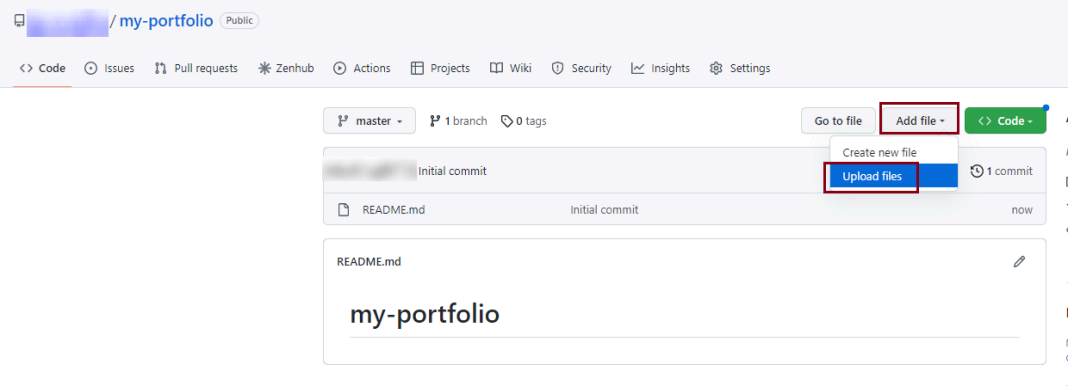
6. Once the `main` branch is selected click on `Save`.



With this, the Github repository and the master branch which will be used to configure the Github pages link to your Portfolio, have been set up.

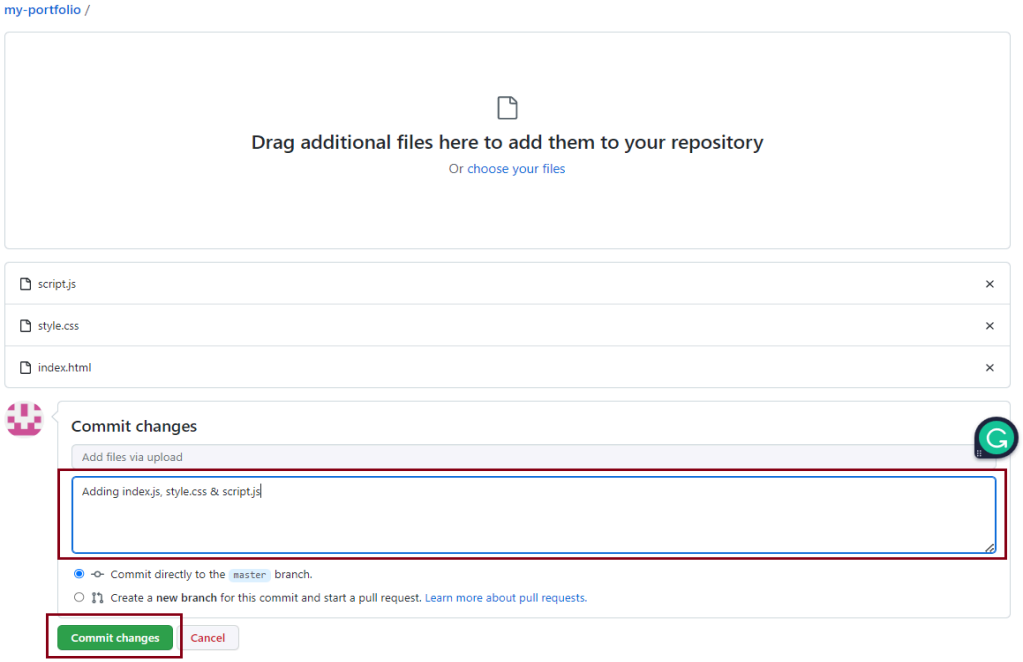
Task 2 : Adding the project files and folders to your Github repository

1. Click on `Add file` and then click on `Upload files` .



2. Drag and drop `index.html`, `style.css` and `script.js` files from where they are stored, to add them.

3. Add an appropriate commit message and click on `Commit Changes`.



4. Click on `Add File->Create New` and enter `html_finalprojimages/readme.md` as filename. This will create a directory `html_finalprojimages` for us to upload the image files. You can add a one-line information in the readme.

5. Add an appropriate commit message and click on `Commit Changes`. This will create the `html_finalprojimages` images directory.

my_portfolio / html_finalprojimages / readme.md in main

Cancel changes

Edit new file | Preview

Spaces 2 No wrap

```
1  This directory has all the images used in the final project.
```

Attach files by dragging & dropping, selecting or pasting them.

Commit new file

A directory for images, along with a Readme.md

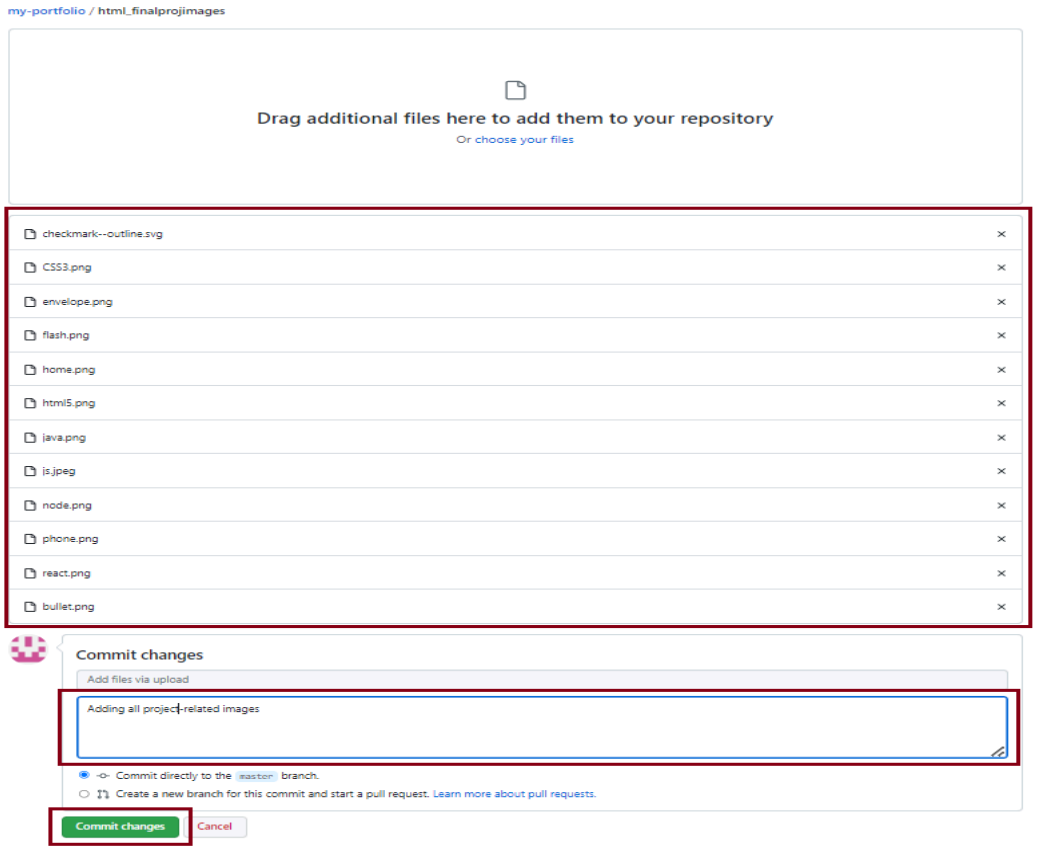
Add an optional extended description...

- (•) Commit directly to the `main` branch.
- ( ) Create a **new branch** for this commit and start a pull request. Learn more about pull requests.

Commit new file | Cancel

6. Click on `Add file`, and then click on `Upload files`, and upload all the files by dragging and dropping them from where they are stored.

7. Add an appropriate commit message and click on `Commit Changes`.



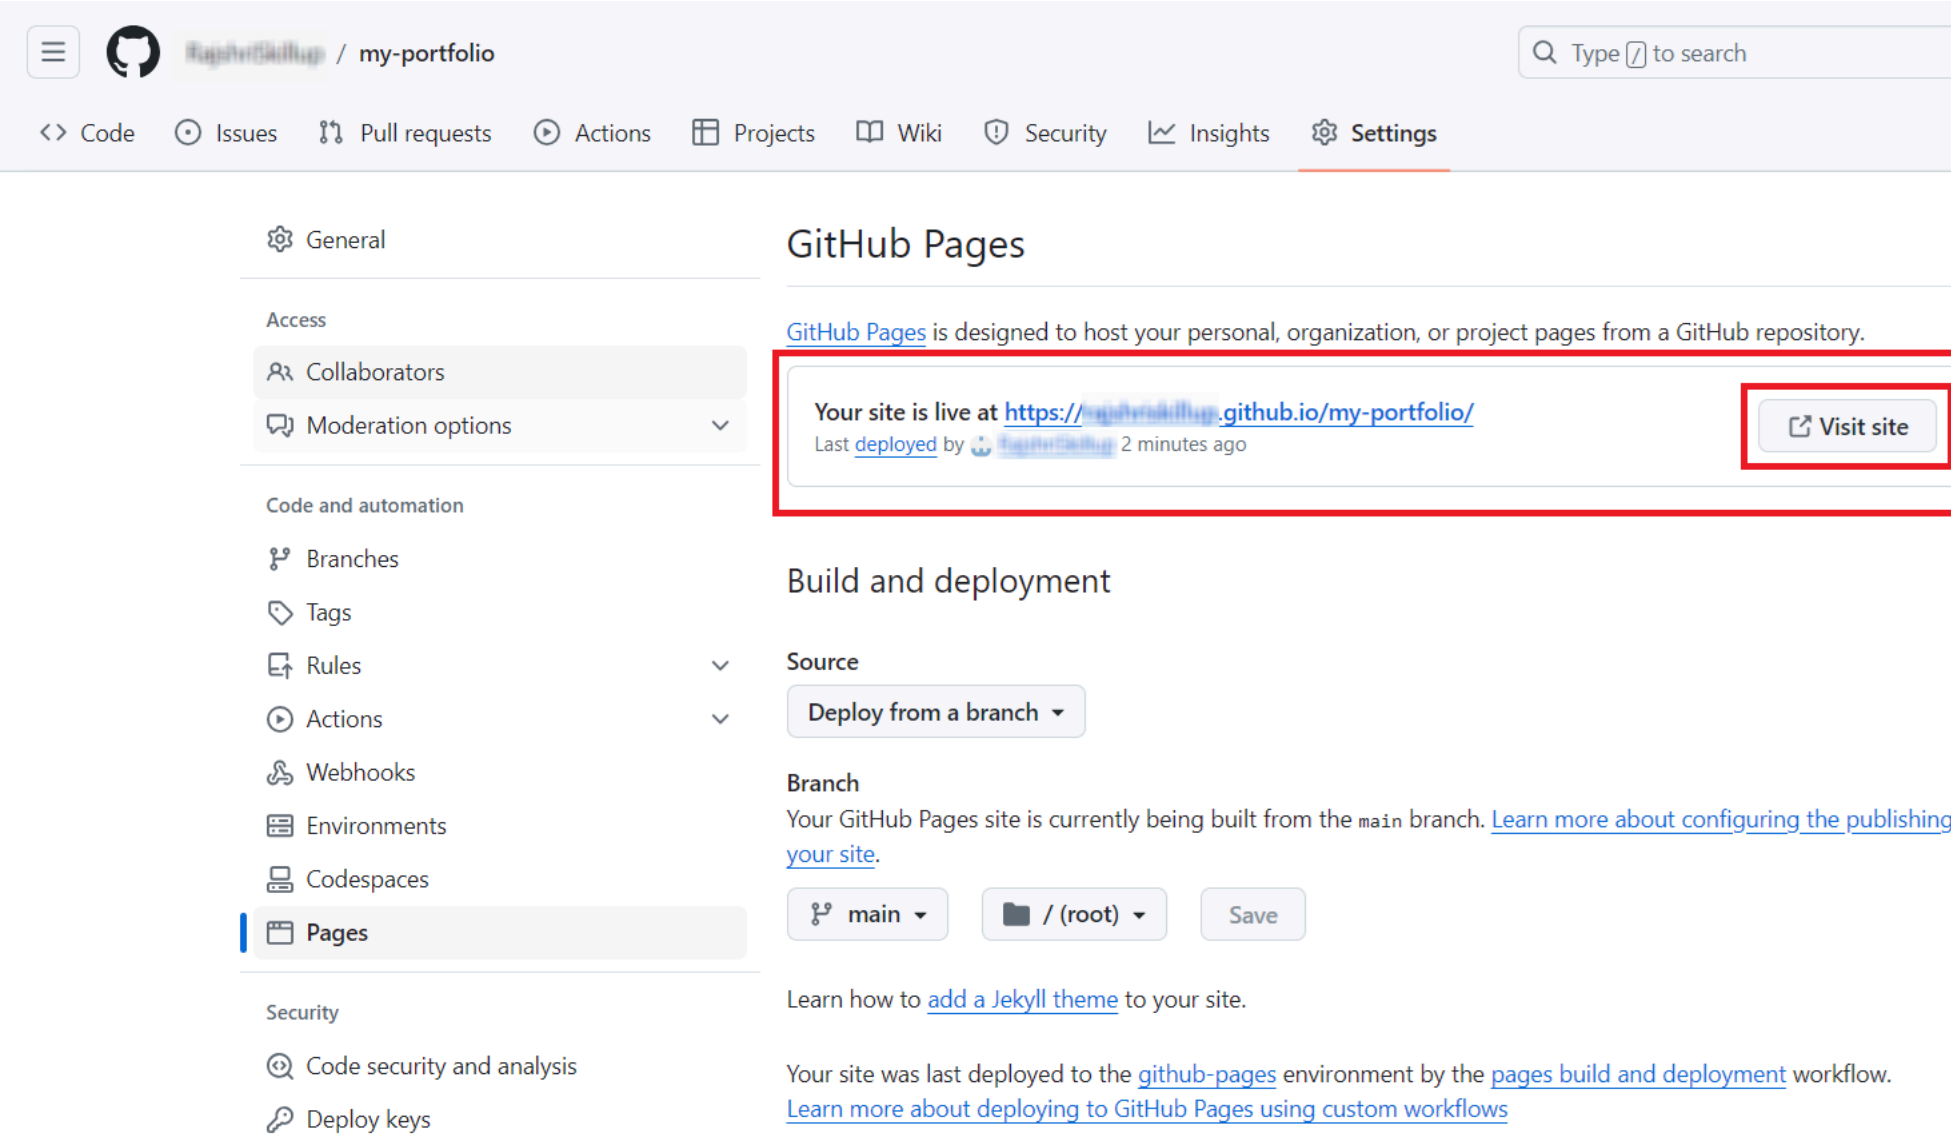
With this, the project files and folders have been added.

Task 3: Accessing your app on the Github Pages link

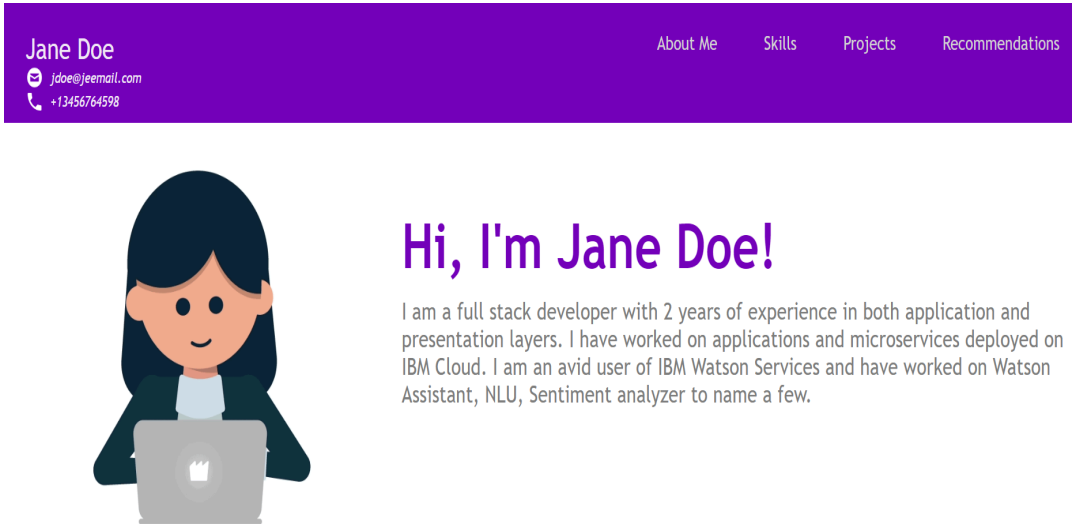
1. Go to the main page of your repository.

2. Go to `Settings` and select `Pages`.

3. Your Github pages link should be visible as below



4. Clicking on `Visit site` will take you to the page where your Portoflio is published.



Congratulations! In this lab, you have successfully published your Portfolio on Github Pages.
